

How-To

Apply Nail Dashes

1 - SIZING

Each dash has a number-size to each nail on both hands TRUE TO SIZE.

2 - PUSH

Push back your cuticle. Try to push them in a u-shape to best fit the dash.

3 - BUFF

Buff your nail surfaces with the pink side of the file.

4 - WIPE

Wipe your nail with our Nail Dehydrator or an alcohol wipe.

5 - SPREAD

Spread or brush on glue evenly on your nail bed - the more glue = the longer they hold.

6 - APPLY

Hold the dash by the sides and apply at a 45 degree angle. Pressing for 45 seconds.

7 - CLEAN

Clean up any glue residue with cuticle stick and cuticle oil.

8 - FILE/CLIP

File or clip if wanted!

3 - BUFF

NUMBER GOES AT THE TIP!

Something to watch for...

The numbered end should be applied at the tip of your natural nail.

It's the thicker end of the Dash and will withstand wear and tear.

The opposite end is rounded to fit the shape of your cuticle.

It's also thinner and may crack or bend if applied at the tip of your natural nail.
